Chapter 1

Hierarchical Index

1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

Chapter 2

Class Index

2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

Chapter 3

File Index

3.1 File List

Here is a list of all documented files with brief descriptions:

Chapter 4

Class Documentation

4.1 Human Class Reference

Inheritance diagram for Human:

4.2 student Class Reference

Inheritance diagram for student:

Collaboration diagram for student:

Public Member Functions

- **student** (const student &other) noexcept
- student & **operator=** (const student &other) noexcept
- **student** (student &&other) noexcept
- student & **operator=** (student &&other) noexcept
- **student** (std::string v, std::string p, std::vector< float > pazymiai, float egz) noexcept
- void **setPazymiai** (std::vector< float > paz) noexcept
- void **setEgzaminoRezultatas** (float egz) noexcept
- void **setGalutinisV** (float V) noexcept
- void **setGalutinisM** (float M) noexcept
- const std::vector< float > & **getPazymiai** () const
- float **getEgzaminoRezultatas** () const
- float **getGalutinisV** () const
- float **getGalutinisM** () const
- float **skaiciuotiVid** () const
- float **skaiciuotiMed** () const
- void skaiciuotiGalutini (char galutinioBudas) override
- void **addPazymys** (float pazymys)

Public Member Functions inherited from Human

- **Human** (const std::string &v, const std::string &p)
- const std::string & **getVardas** () const
- const std::string & **getPavarde** () const
- void **setVardas** (const std::string &v)
- void **setPavarde** (const std::string &p)

Friends

- std::ostream & **operator**<< (std::ostream &os, const student &studentas)
- std::istream & **operator**>> (std::istream &in, student &studentas)

Additional Inherited Members

Protected Attributes inherited from Human

- std::string **vardas**
- std::string **pavarde**

4.2.1 Member Function Documentation

4.2.1.1 skaiciuotiGalutini()

```
void student::skaiciuotiGalutini (
            char galutinioBudas)  [inline], [override], [virtual]
```

Implements Human.

The documentation for this class was generated from the following files:

- C:/Users/Lenovo/Desktop/2-uzduotis/vector/include/student.h
- C:/Users/Lenovo/Desktop/2-uzduotis/vector/source/student.cpp

Chapter 5

File Documentation

5.1 C:/Users/Lenovo/Desktop/2-uzduotis/vector/include/functions.h File Reference

this file contains functions declarations

```
#include <vector>
#include "student.h"
```

Include dependency graph for functions.h: This graph shows which files directly or indirectly include this file:

Functions

- void **rusiuotiOutput** (std::vector< student > &grupe, char rusiavimoBudas, char galutinioBudas)
- void **spausdinimasTerminale** (const std::vector< student > &grupe, char galutinioBudas)
- void **spausdinimasFaile** (const std::vector< student > &grupe, char galutinioBudas)
- void **generuotiFaila** (int pKiekis, int studentuKiekis, const std::string &failoPavadinimas)
- void **spausdinimas** (char spausBudas, char rusiavimoBudas, char galutinioBudas, std::vector< student > &grupe)
- void **sortedStudentSpausdinimas** (std::string lowGradeFailas, std::string highGradeFailas, std::vector< student > &nepazangus, std::vector< student > &normalus, char galutinioBudas)
- void **nuskaitytiGeneruotusFailus** (const std::string &failoPavadinimas, std::vector< student > &grupe, int pKiekis, char galutinioBudas)
- void **skirstytiStudentus** (std::vector< student > &grupe, std::vector< student > &nepazangus, std::vector< student > &normalus, char galutinioBudas)
- void **pirmas** (std::vector< student > &grupe, char spausBudas, char rusiavimoBudas, char galutinioBudas, int pKiekis)
